

Labor Distribution EPAF's problems

This is to alert you that we are encountering a problem with processing labor distribution EPAFs. We have discovered that Current Job Labor Distribution values are NOT populating the EPAF (the EPAF comes up blank). We think this happens when a future effective dated job labor distribution record is removed so that the user can enter new distribution records. We have asked our HRIT team to help us determine the cause of the problem which we hope to fix as soon as possible. In the meantime, there is a workaround – until this problem is fixed, please manually enter in only the New Job Labor Distribution information on the bottom half of the appropriate EPAF
